Your Cell Phone Number: _____

Okay to text you? ☐ Yes _____

Your Email Address: _____

Firearm Manufacturer: _____

Firearm Model: _____

Firearm Serial Number: _____

(If you cannot find a serial number, write "NVSN")

Please send an exact description of the firearm problem. Be as specific as possible – e.g., whether it shoots okay with some ammo and not others (Specify what works and what doesn't), whether the environment temperature affects the problem, etc. If it jams, please include pictures of the firearm in a "jammed" condition before manually removing the spent or unspent (or both) round(s). Use the back of this page and include additional pages if you need. The more information you can provide, the quicker I can identify and correct the problem. If you send me a firearm for upgrade or modification, either include all the parts or specify as clearly as possible what parts you particularly desire to be installed, including the manufacturer and specific model(s) if you know what you want. Please assume I will not remember what we discussed when you contacted me. And thank you for your business.
